HELP YOUR FOREST FIRE WARDEN

PREVENT FIRES — IT PAYS

Prevention is one of the most important phases of all fire effort. This is particularly true of forest fire control work. Preventing forest fires preserves valuable forest growth and

other property, conserves man power and permits their use in productive channels, saves taxpayers' money and conserves fire fighting equipment.

The prevention of forest fires is the most important and difficult part of the work of your forest fire warden who heads a local organization set up primarily for the security of your community's forest property. Appointed by the State Forester, upon recommendation of the Selectmen, he is charged by law with the responsibility of local administration of forest fire laws, fire prevention and suppression. In his work he is aided by deputy forest fire wardens who, in emergency, may assume his power and authority. The warden is guided in his work by instructions received from the State Forester and by the District Fire Chief who represents the State Forester.

The importance and value of the work of the forest fire warden and his deputies is, perhaps, best appreciated during hazardous periods when fire danger is greatest. The public, however, looks to him at all times for speedy and economical suppression of going fires.

To properly fulfill his mission, the warden needs the generous and understanding cooperation of the public at large. He attempts to secure this cooperation by the posting of caution notices, news items and by word of mouth, always carefully explaining the necessity of restrictions imposed. In the matter of giving cooperation, however, the public often fails. The record shows that an average of 7,300 acres of woodland are burned over by forest fires in New Hampshire each year. Analysis of fire causes reveal the fact that more than 98 percent of all forest fires are, consistently, the result of human carelessness and are preventable.

The careless smoker fails to properly extinguish his cigar, cigarette or pipe ashes or thoughtlessly throws them from the car window; the debris burner fails or refuses to consult the warden, as the law requires when the ground is not covered with snow, before attempting to burn; campers fail to

properly extinguish their fires or frequently build fires when conditions are unfavorable.

The elimination of human causes from the forest fire problem is the answer. This is not as difficult of accomplishment as it might appear at first glance. Let each one who reads this—

1. Use ordinary common sense with fire in and near woodland.
2. Comply with requirements on the use of fire in and near woodland and when the ground is not covered with snow, secure written permission to burn from the forest fire warden.
3. Be careful when smoking in or near woodlands. Don't throw lighted material from moving vehicles.
4. Cooperate with and assist the warden and urge others to do so.
5. **HELP YOUR FOREST FIRE WARDEN PREVENT FIRES**—his efforts are only as effective as is the co-operation you give him!

S. H. BOOMER,
District Fire Chief.

REPORT OF SUPERINTENDENT

To the School Board and Citizens of Albany:

The pupils of Albany have for the second year been transported to the schools in Conway. It is going to be more difficult to secure teachers for the coming school year than it has been for the past two years. There will be only 32 elementary teachers graduated from the two New Hampshire teachers' colleges this June and there will be about 200 vacancies.

Pupils from Albany who are attending high school are Arthur Drouin, Arthur Leavitt, Doris Littlefield, and Earl Lavender. For the school year ending June, 1946 there were a total of 22 pupils registered in the Conway elementary schools. Their success in their school work is a credit to themselves and the people of Albany.

Respectfully submitted,

HAMMOND YOUNG,
Superintendent.
